## EDUCATION

### LJ University

BCA - Bachelor of Computer Application  
(Pursuing)

### Navyug Vidhyalaya, Morbi

HSC-2022 (92.59 PR)

### Navyug Vidhyalaya, Morbi

SSC-2020 (93.6 PR)

## TECHNICAL SKILLS

- Full-Stack Development
- Web Development Frameworks
- Version Control

## SKILLS

- Problem Solving
- Time Management
- Multi-tasking

## LANGUAGES

- English
- Hindi

## WORK EXPERIENCE

### Intern as a Software Engineer

Aug 2024 - Dec 2024

#### Cincologic Software Solution

As a Software Engineering Intern at Cincologic, I contributed to the development of scalable, user-friendly web applications using React, JavaScript, and modern frontend technologies. Collaborating with cross-functional teams, I gained valuable experience in problem-solving, coding best practices, and delivering optimized solutions in a fast-paced environment.

### Full Stack Web-Developer (Intern)

Jun 2024 - Jul 2024

#### Sharp-Career Technology

As a Full Stack Developer Intern at Sharp Career, I worked on developing end-to-end web applications, utilizing both frontend and backend technologies. My responsibilities included building responsive user interfaces, optimizing backend performance, and ensuring seamless integration between the server and client-side, contributing to enhancing the platform's overall functionality.

## PROJECTS

### 1.E-Commerce Website With Payment Gateway

As a Full Stack Developer Intern at Sharp Career, I worked on developing end-to-end web applications, utilizing both frontend and backend technologies. My responsibilities included building responsive user interfaces, optimizing backend performance, and ensuring seamless integration between the server and client-side, contributing to enhancing the platform's overall functionality.

### 2. Cincologic Official Website

Developed the official Cincologic website using .NET Entity Framework for the backend and HTML, CSS, and JavaScript for the frontend. The project involved building a responsive and dynamic web interface, ensuring smooth integration with the backend for efficient data management and seamless user experience.

### 3. Quick Service Finder

Developed a live project, Quick Service Finder, during my internship using React for the frontend and .NET Web API for the backend. The platform enables users to search for service providers within a specified kilometer range using geolocation APIs for accurate results. Focused on creating an intuitive user interface, dynamic search functionality, and scalable backend to ensure a seamless and efficient user experience.
